

EXTEND THE VALUE OF YOUR IBM COGNOS SOLUTION WITH

METAMANAGER^(R)

The enterprise solution for managing, enhancing, and securing your performance management solution

PRODUCTIVITY TOOLS FOR IBM COGNOS

MetaManager automates, simplifies, and streamlines many of the complexities associated with metadata, data management, security and compliance at the developer, administrator and consumer level.

MetaManager offers administrators and developers the ability to gain full control over all aspects of their deployment through one intuitive, powerful user interface. Through the various product modules, users are able to save tremendous time automating manual processes while adding a wealth of capabilities to extend the value of the out-of-the-box IBM Cognos software.

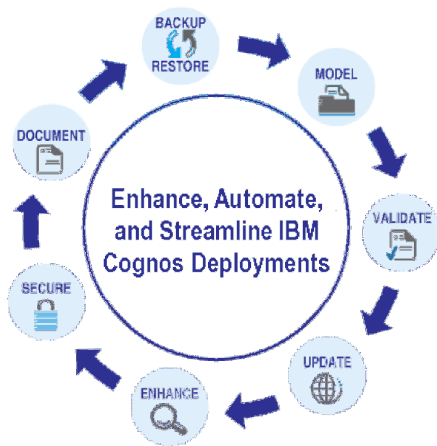

Accomplish much more with much less time and effort! MetaManager's thousands of capabilities make this suite of productivity tools a must have!

DELIVER MORE IN LESS TIME AND WITH GREATER EFFICIENCY

"We successfully demonstrated a 100% ROI in the first few months of using MetaManager."

Jim Mulholland,
Vice President of
Information Technology of
Creativity, Inc.

MetaManager Benefits:

- Enhance modeling functionality to expand metadata management capabilities
 - Automate report validation and impact analysis from Framework Manager model changes
 - Easily apply Framework Manager model / package changes to impacted reports
 - Backup, restore, and deploy selectable Content Store objects within and across environments
 - Apply and maintain security within selected Content Store objects
 - Conduct advanced search and replace within selectable report objects including Data Items, HTML / JavaScript, Report Expressions, etc.
 - Manage the distribution of portal tabs
 - Document the contents of Framework Manager models and the Content Store to gain insight into group memberships, capabilities and object access rights
 - Extend the value of metadata in end-user reports through automated screen tips
 - Manage group and role memberships through batch import or user interface
- Gain insight into the size of your Content Store with exposure to package, folder and report size, as well as My Folder content
 - Document functional report specifications, detailing page content, query information, filters and more.
 - Much more!
