

EXTEND THE VALUE OF YOUR IBM COGNOS SOLUTION WITH

VALIDATOR FOR SERIES 7 POWERPLAY™

Leverage this **FREE** utility for Administration and Maintenance or Migration

A VALIDATION TOOL FOR SERIES 7 CONTENT

The Validator for Series 7 PowerPlay was designed by BSP Software in conjunction with Cognos, an IBM Company, as part of the PowerPlay 7.4 to Cognos 8 Migration Utility.

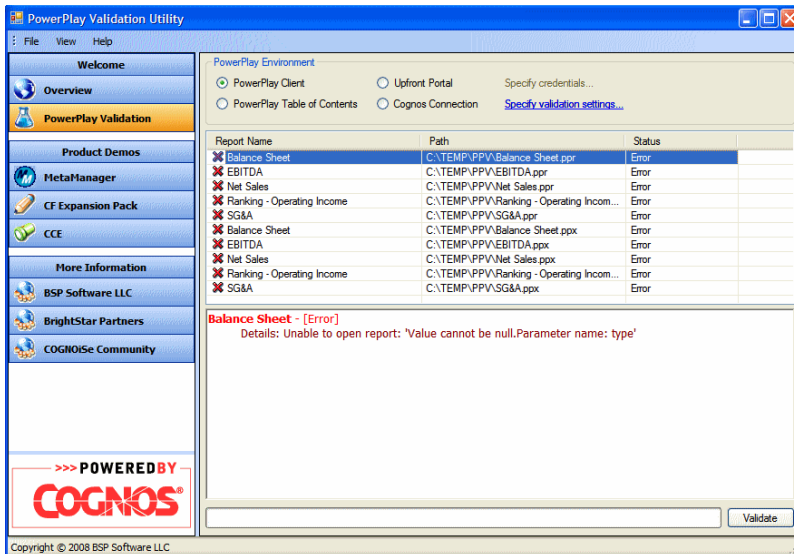

As a routine part of Series 7 Administration and Maintenance, Validator for Series 7 PowerPlay can be used to determine all content in error and identify the root cause so that content can be resolved or removed.

For customers migrating to IBM Cognos 8 BI, this utility can be used pre-migration to validate existing PowerPlay Series 7 content and resolve or eliminate pre-migration problems.

DELIVERS MORE IN LESS TIME AND WITH GREATER EFFICIENCY

"Through our long tenure working with the IBM Cognos suite of products, we were thrilled to leverage expertise to develop a free migration utility for IBM Cognos customers around the globe."

Validator for Series 7 PowerPlay Features:

- Content validation of PowerPlay reports in:
 - ⇒ PowerPlay Client
 - ⇒ PowerPlay Enterprise Server Table of Contents
 - ⇒ Upfront
 - ⇒ Cognos Connection
- Validation reporting indicating the location, validation results, and detailed information on those reports in error.
- Error Reporting to isolate issues prior to Migration
