

Content Management for IBM Cognos

INTEGRATED ARCHIVE SERVICE™

SECURE CONTENT MANAGEMENT

With the ever increasing regulations placed on preserving and archiving content such as financial reports, the impact on an IBM Cognos environment can be substantial. Archiving report outputs within Cognos can result in an ever-growing Content Store database that over time can negatively impact performance. In addition, there are limitations on the number of outputs that can be stored.

Integrated Archive Service was designed to address sizing and space issues, as well as content preservation. This incredibly powerful, yet straightforward and transparent solution can be up and running in a matter of minutes.

Integrated Archive Service addresses the following:

- ❑ Preservation of report output results in a large and continuously growing content store database, which can lead to issues when upgrading your environment.
- ❑ Performance decreases as more and more content is stored in the Content Store.

Integrated Archive Service is the **ONLY** Real-Time, Transparent, and Truly Integrated Archive Management solution for IBM Cognos.

AN INTEGRATED, REAL-TIME, SOLUTION

"Integrated Archive Service has enabled us to preserve important content in a secured manner without concern for performance."

Integrated Archive Service Benefits:

- ☑ Securely archive Cognos content (report output) outside of the Content Store
- ☑ Access archived content directly within IBM Cognos Connection
- ☑ Integrated security within Cognos Administration
- ☑ Integrated Archive Service Administration console coupled directly inside Cognos Administration
- ☑ Support for an unlimited number of report outputs to be stored and retrieved
