

**Leverage the Power of SharePoint with your IBM Cognos Content**

# CONTENT EXTRACTOR FOR MICROSOFT SHAREPOINT™

## ACCESS IBM COGNOS CONTENT FROM WITHIN MICROSOFT SHAREPOINT PORTAL

Microsoft SharePoint allows organizations to facilitate collaboration, provide content management features, implement business processes, and supply access to information that is essential to organizational goals and processes. The portal provides an integrated location where employees can efficiently collaborate with team members, find organizational resources, search for experts and corporate information, manage content and workflow, and leverage business insight to make better-informed decisions.

The Content Extractor for Microsoft SharePoint combines the capabilities of the Microsoft SharePoint Portal with the power of IBM Cognos BI. IBM Cognos archived content from previously run or scheduled reports that are stored in the Content Store database is synchronized to the desired location in your SharePoint Portal. The content is automatically renamed to reflect the name in IBM Cognos Connection, with the run data / time stamp appended.

## AN INTEGRATED, CORPORATE-WIDE LOCATION FOR YOUR CONTENT

"Content Extractor for Microsoft SharePoint allows our organization to manage and access vital information all within one centralized organization. We get to collaborative capabilities of SharePoint with the Power of IBM Cognos."
