

# EXTEND THE VALUE OF YOUR IBM COGNOS SOLUTION WITH

# CPM EXPLORER<sup>(R)</sup>

*Simplify the IBM Cognos user experience within the familiar Windows Explorer interface*

## WINDOWS EXPLORER INTEGRATION

CPM Explorer is a Windows Explorer extension for IBM Cognos Connection, providing quick and easy access to consumers' daily activities. Using CPM Explorer, consumers are able to navigate the IBM Cognos Connection portal from within the familiar Windows Explorer user interface without the need for a web browser.

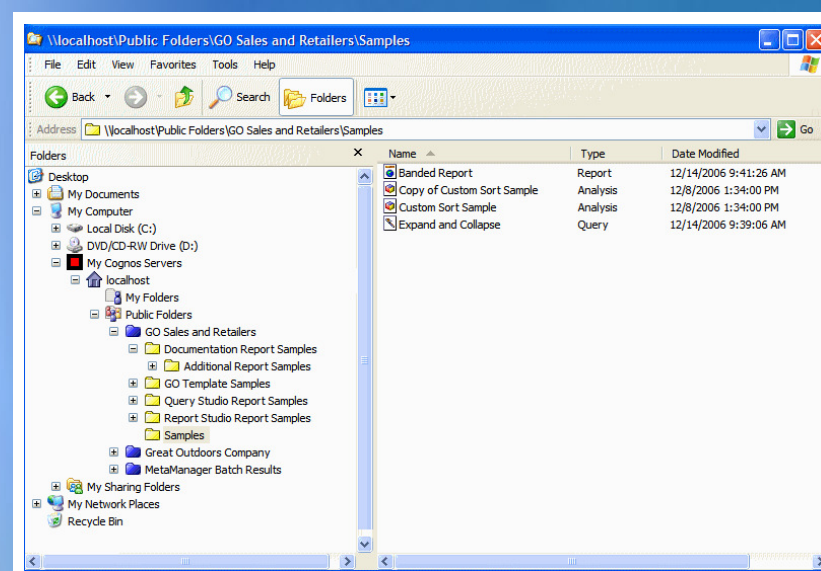

Users can run and email reports directly from within Windows Explorer. With a single click a report can be scheduled to run in the background and emailed when it is available. Best of all, this is all done leveraging your existing IBM Cognos security (Cognos and company LDAPs). CPM Explorer adheres to your IBM Cognos 8 security by enforcing each consumer to log in before being able to browse the contents of IBM Cognos Connection

CPM Explorer can connect to multiple IBM Cognos 8 servers within the Windows Explorer UI. Each Cognos 8 server connection is displayed in the Windows Explorer tree view under a "My Cognos Server" node.

## INCREASE USER ADOPTION THROUGH A SIMPLIFIED EXPERIENCE

*"We were able to train new users and greatly increase user adoption rates through the Windows Explorer interface to Cognos Connection"*

## CPM Explorer allows Cognos users to:

- Create Folders
- Rename Reports
- Create Report Shortcuts
- Move, Copy and Promote Content and Folders
- View and Run reports in HTML, PDF & Excel
- Email Report Output
- View Report Properties

BSP Software is an IBM Partner and member of the IBM Global Solutions Directory program. With a team of senior Professional Services and Product Development resources, BSP Software LLC and BrightStar Partners provide service offerings and Implementation-Based Software solutions to IBM Cognos customers worldwide.
