

Integrated Management Suite for IBM Cognos

Reduce documentation and audit tasks from weeks to minutes

Tech Data's Integrated Management Suite allows IBM Cognos administrators and Cognos users the ability to search, audit, and document a variety of issues within a Cognos environment then output that documentation into a user friendly format for analysis. Integrated Management Suite allows users to identify unknown issues before they cause problems.

As a feature-rich IBM Cognos Analytics enhancement, Integrated Management Suite is fully integrated into the IBM Cognos Portal as an IBM Cognos Analytics Extension. Integrated Management Suite allows Cognos users to explore and document Cognos within a variety of use cases, including:

Audit

Use the Audit module to easily identify scheduled content, large report outputs, and overwritten security policies.

Management

Maintain an organized environment by using the Management module to find and relocate orphaned accounts plus assign ownership to previously owned items in the content store.

Search

Leverage the Search modules to quickly locate and document reports not linked to a package or schedules run by specific Cognos accounts.

Validation

Effortlessly validate all IBM Cognos Analytics datasources with the click of a button.

Looking to Streamline Efficiencies? Shift Simple Tasks to Users

With the Integrated Management Suite, tasks previously reserved for the Cognos Administrator can now be completed by any number of Cognos Users. The power of the Integrated Management Suite is now a force multiplier for your documentation requirements.

Preparing for an IBM Audit? Seamlessly Manage Cognos Licenses

Because the Integrated Management Suite fits seamlessly inside Cognos Analytics, it is easy to perform continual audits and assessments. The Audit module will help you understand your full IBM Cognos license allocations including which types of licenses are currently allotted to each user.

Configuring Cognos Environments? Leverage Customization Features to Meet Your Business Needs

For quick return on projects like documentation, auditing or security concerns, administrators can configure and customize the Integrated Management Suite experience directly from the extension.
